

Shaik Parvez

Hyderabad, Telangana | 9492918540 | parvezsk2703@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Detail-oriented Data Analyst skilled in Python, SQL, Power BI, and Excel with hands-on experience in EDA, DAX, Power Query, KPI Reporting, and Data Modeling. Proficient in building interactive dashboards and analytical reports to deliver actionable insights and support data-driven decision-making.

EDUCATION

Sri Chaitanya Institute of Technology and Research

Bachelor of Technology in Computer Science and Engineering

Khammam, Telangana

Oct. 2021 – Jul 2025

EXPERIENCE

Data Analyst Intern

UnlockDiscounts

March 2026 – July 2026

Remote

- Analyzed business and customer datasets using Excel (Pivot Tables) and Power BI to identify trends, track KPIs, and support data-driven decision-making.
- Performed data cleaning, transformation, and validation to improve data quality and ensure accurate reporting.
- Built 2 interactive dashboards independently within a 5-member analyst team, tracking KPIs and business performance metrics for stakeholders.
- Created analytical reports for UnlockDiscounts, helping stakeholders evaluate key metrics, identify trends, and support business decisions.

PROJECTS

Customer Churn Analysis | *Power BI, DAX, Power Query, Data Modeling*

[GitHub](#)

- Uncovered key churn drivers — contract type, tenure, and service usage — across 7,000+ customers using segmentation analysis.
- Quantified a 26.54% churn rate and its impact on INR 139K revenue loss through KPI and churn analysis.
- Delivered retention recommendations targeting high-risk customer segments for stakeholder decision-making.

World Wide Energy Consumption Analysis | *SQL, MySQL, Data Modeling, Data Analysis*

[GitHub](#)

- Integrated 6 interconnected datasets spanning energy consumption, GDP, population, and emissions to uncover global energy trends.
- Wrote 20+ SQL queries using JOINS, CTEs, and Aggregate Functions to perform trend and emissions analysis.
- Identified energy consumption trends across 5 major economies using GDP and emissions analysis.

Google Pixel Mobile Data Analysis | *Python, EDA, NumPy, Pandas, BeautifulSoup, Requests*

[GitHub](#)

- Developed an automated Flipkart web scraping pipeline using Python, Requests, BeautifulSoup, Pandas, and NumPy, extracting and structuring 550+ smartphone records.
- Performed data cleaning, preprocessing, feature engineering, and EDA to prepare analysis-ready datasets.
- Identified pricing, ratings, RAM, and storage trends to generate actionable business insights.

TECHNICAL SKILLS

Languages : Python, SQL

Data Analysis : Exploratory Data Analysis (EDA), Power BI, Excel, DAX, Power Query, KPI Reporting, Statistics

Databases & Tools : MySQL, Git, GitHub, Jupyter Notebook, Power BI Desktop, VS Code

Libraries : Pandas, NumPy, Matplotlib, Seaborn, BeautifulSoup, Requests

Concepts : Data Cleaning, Data Transformation, Feature Engineering, Data Visualization, Business Intelligence

CERTIFICATIONS

- Certification in Data Analysis – Innomatics Research Labs (March 2026)
- McKinsey Academy Forward Program – McKinsey & Company (December 2025)
- SQL Certification – HackerRank (March 2026)
- Power BI Certification – Innomatics Research Labs (March 2026)

ACHIEVEMENTS

- Secured 8th Rank (Top 10) in AMD Slingshot Hackathon, a national-level AI & innovation challenge by AMD.
